Alexandria, VA 22313-1450

TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicant and/or his attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicant nor his attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

1. A completed copy of Form(s) PTO/SB/08a "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form(s) PTO/SB/08a, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after June 30, 2003.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

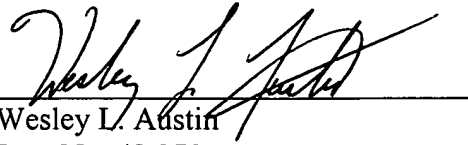

1. Japanese Patent Application No. 2002-297330 published October 11, 2002 discloses a system and method to provide a printing system which reduces the load of a printer or a printer server or reduces the load of a network by using a pull print function. The system consists of at least one client terminal, a printer and a printer server at need and these can communicate with each other through the network. Each of the client terminals has a function for storing printing data with respect to a printing request from a user, a function for opening the stored printing data and a function for transmitting the printing request to the printer or the

printing server. In an example, the printer has a printing management function and a pull printing function, manages the printing request from a client, and when the turn of printing comes, the printer obtains the printing data from the client for printing.

2. Japanese Patent Application No. 2002-287931 published October 4, 2002 discloses a system and method to easily use an IPP-oriented printer under the network environment. The print data requested for printing are maintained in a hard disk reference information for performing pull-print corresponding to the maintained print data is generated by a Web server, reference information for performing pull-print corresponding to the generated print data is issued for the printing request to a printer communicable via a predetermined communication medium.

3. Japanese Patent Application No. 2001-350745 published December 21, 2001 discloses a system and method to provide a document processor, which considers pull-print capable of improving convenience by easily setting the conditions of recursive acquisition. The device has a means for holding a managing table relatively describing reference information, the conditions of an acquisition and the processing conditions of an acquired document, means for receiving the designation of the reference information , a means for recursively acquiring document data according to the conditions of recursive acquisition related to the relevant designated reference information, which becomes a starting point, on the basis of reference information set in document data to refer to inside the relevant reference information as a starting point, and a means for processing the acquired relevant document information according to the processing conditions related to the reference information which becomes the starting point.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Wesley L. Austin", is written over a horizontal line.

Wesley L. Austin
